

Services

At SVS, our services are completely independent, allowing uncompromising dedication to you as your consultant, architect and/or project manager.

Our experts draw the best ideas from each facet of the Specialty Vehicle industry and combine them with proven techniques to assemble the very best solutions for you.

Our services are modular to provide continuous results while integrated to support our proven methodology for complete concept to delivery solutions.

...Consultation

Knowledge is the cornerstone of any successful project. Our extensive experience allows you the information needed to make wise decisions about the course of your project. Near elimination of your learning curve aids in rapid project development, reduction of risk and maximization of your resources.

...Design

Your design and specifications mesh to form the best tool for conveying your desires. Accurate and concise documents lay the foundation for competitive bids, fewer mistakes, and quicker deliveries. SVS uses the latest Computer Aided Drafting (CAD) software and proven specification formats to ensure your project is designed properly.

...Management

SVS offers complete project management packages to significantly reduce your labor expenses and effectively eliminate the chance of costly mistakes. Our packages are developed specifically for your situation and can include items such as contract negotiations and vendor interaction.

...Inspection

SVS conducts comprehensive 172-point inspections to ensure your project is built to the highest quality standards; both above and below the surface. As an added value, your project is also inspected for compliance with all applicable FMVSS, DOT and ANSI standards.
